

# *After the Battle - Plackband*

XYM 1002

After 25 years they finally did it. The first Plackband album release ever. Under licence from Dutch proglabel Xymphonia Records.

"After the Battle": on sale now!

After a long time the band is again on the road, and will promote the album on festivals, radio- and TV shows. In the seventies and eighties they were called the "Dutch Genesis".

Loads of Mellotron, Taurus Pedals, Rickenbacker, Minimoog, Hackett and Howe guitar parts, sprinkling percussion and very melodic vocals and harmonies. A must for every sympho and progfan.

Absolutely the best Dutch sympho production ever.

"At the moment there is a lot of Dutch competition for Entropy. Bands like After Forever, Within Temptation and The Gathering are doing well. Not only in The Netherlands but also abroad. But Entropy could have their own place because their music is different."
